6 September 1996

TO WHOM IT MAY CONCERN

Harrap Contracting was engaged by CBI Constructors to perform miscellaneous tasks during 1996 shutdowns at BP Refinery, Bulwer Island. The tasks varied from boilermaking to structural work to installation of vessel internals.

Greg Harrap led his crew proficiently with the determination to achieve all the deadlines imposed on him.

All I have is words of praise for Harraps' Contracting performance and high commendations for their future employment.

IAN ALWAN
Deputy Project Manager
